

## Description :

The limiter kit FML01 is designed for the Mygale Formula Campus.

The kit includes :

- the limiter box.
- a relay box which replace those already present on the master switch.

- 1 : Engine loom connector.**
- 2 : To relay box connector.**
- 3 : Relay box connector.**
- 4 : XAP master switch connector.**

## Installation :

- Replace the XAP master switch relay box by those included in the kit.
- Connect the limiter box to the new relay box using the connectors (2) and (3).
- Connect the limiter box to the DIAG connector of the engine loom using connector (1). Do not confuse with another identical connector of the cockpit loom. The red led on the box should light on when the switch is on.
- The limiter box fixation should be flexible (isolator foam).
